A fresh graduate with a Bachelor's degree in Computer Science, majoring in Business Information Systems from the University of Surabaya, graduating in 2023. I have interests and skills in UI/UX design, web development, and data analysis for business processes needed to solve the current problems. Currently, I am actively involved as a freelance UI/UX designer and web developer. I am capable of effectively creating innovative solutions for current technological challenges and ready to continuously develop my skills and contribute to advancing information technology for the growth of the company.

Experience

Freelancer UI/UX Design - Fiverr (2022 - Now)

- Conducting brainstorming sessions to generate ideas or solutions to address the current problem faced by the client.
- Designing the prototype of the application or website according to client requirements using Figma.
- Converting the prototype design to HTML, CSS, and JavaScript using the Vue or React framework.

Full Stack Developer - GABSI Jawa Timur (Feb - Jul 2022)

- This internship aims to create an information system that facilitates GABSI East Java in managing information about bridge competitions, accessible to website visitors.
- Creating a content management system and designing the entity diagram for the database structure of the GABSI East Java website using the Laravel framework.
- Performing periodic updates in case there are additional features requested by internal committee members.

Publication Documentation Division - KSM Foto Media UBAYA (2019 - 2021)

- Managing, creating, and editing posters or banners for events organized by the organization.
 - Capturing photo and video documentation during campus or organizational events and compiling them into documentary videos.
 - Providing education on the correct procedures for photography to the freelance committee.
-
